FOR RECEIVABLES MANAGEMENT LAW FIRMS

Most payment vendors want your volume. **We earn your trust.**

Payments built for the weight a receivables practice actually carries: trust accounting, bar oversight, and consumer-protection law on every dollar.

Recover more. Worry less.

THE PROBLEM

The payment layer shouldn't be your liability.

A receivables management practice carries weight most vendors never think about. Trust accounting, bar oversight, and consumer-protection law ride on every dollar you move.

Yet most payment tools were built for retail checkouts and then pointed at your firm. Hidden fees. Support that disappears when a deposit doesn't land. Funds handling that leaves you exposed.

You shouldn't have to read the fine print to trust the company processing your clients' money.

THE DIFFERENCE

Built for how your firm actually works.

Transparent

No games with fees or terms. You always know exactly what you pay, and why.

Experienced

Decades in payments and receivables management. We've seen what breaks and built around it.

Accountable

Trust-account segregation and court-ready records on every transaction. We own the outcome.

"Your funds, your clients, your reputation. We treat all three like our own."
